

We have designed and undertaken 1000's of projects over our 23 yrs of trading and had to solve all kinds of common problems in order to create very usable, inviting, low- maintenance and feature gardens.

Our design service offers the following benefits:

- * 3D scale visualization of the design
- * Problem solving
- * Incorporating the very latest in contemporary products.
- * A visual of the project to show prospective contractors.
- * We can design around a set budget.
- * Cost of design work refunded if you would like us to undertake the work. But no obligation to do so.
